

PUPPET PERFORMANCE WORKSHOP

THE MAGIC LIGHT PUPPETS

Not only do we perform but also make and design a variety of puppets for stage and television. We also hire UV sequences to some of the top Pantomime Companies in the UK not only providing the Puppets and the Routines but also supply the Edited Soundtrack as well.

We have provided puppets for many UK Theatre Tours including BBC's Chuckle Brothers and have recently created all of the Ghosts and Monsters for Joe Pasquale's touring Musical Rentaghost. We specialize in Black Light 3D Puppets (UV), and anything from a ventriloquist puppet up to a full size stage body character/costume. We also hand carve in wood Punch and Judy characters.

Our workshops are booked across the country and have recently been part of West End Stage Summer School in London.

In our workshops, the children have the chance to work with a puppet (in the same style as Avenue Q) and create their own character. They will then improvise a scene in groups based on a scenario (age dependent) and perform their scenes back to us. We will talk about each scene, the use of the puppet and discuss as an audience what is effective. Then finally they will learn and perform the opening song to Avenue Q - only a minute long and easy to pick up, so they get an opportunity to perform a song of that speed with their puppet character.

We also offer a UV puppetry workshop where we cover the difference in staging and choreography and look at the style of puppetry needed when working on a black light routine.
